

QuantumCart Loyalty Platform - Business Requirements

QuantumCart introduces personalized loyalty tiers, rewards redemption, partner campaigns, support overrides, and fraud-aware

Business objectives

- BO-01 Increase repeat purchase rate by 18% through loyalty engagement.
- BO-02 Reduce loyalty redemption failures below 0.5% during checkout.
- BO-03 Enable partner campaign experimentation with budget controls.
- BO-04 Provide audit-ready reward ledger traceability and settlement reporting.

Business Rules Table

Requirement ID	Business Rule	Priority	Acceptance Signal
BR-101	Reserve points before checkout authorization and commit after order confirmation.	Critical	No negative balance or duplicate redemption ledger lines.
BR-102	Recalculate tier upgrades after return windows close.	High	Tier history shows pending, effective, and revoked states.
BR-103	Support overrides above 5,000 points require manager approval.	Critical	Approval trail includes requester, approver, reason, timestamp.
BR-104	Partner campaigns enforce audience eligibility and budget caps.	High	Campaign stops issuing rewards when cap is exhausted.
Operational reporting needs			

Dashboards must show redemption rate, failed redemption count, point liability, partner budget consumption, support override volume, unresolved ledger exceptions, and pipeline readiness for generation.
